EDUCATION

Dhirubhai Ambani University

Bachelor of Technology – Information and Communication Technology

Gandhinagar, India

Expected 2028

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C/C++

Frameworks & Libraries: FastAPI, LangChain, LlamaIndex, React, Express.js, Next.js

Cloud & DevOps: AWS (EC2), Docker, Kubernetes, CI/CD (GitHub Actions)

Databases: PostgreSQL, Prisma, MongoDB, NeonDB, Pinecone

EXPERIENCE

Datacurve.ai (Y Combinator Backed)

Core Code Reviewer & OSS Developer

Remote

Jan 2026 – Present

- Developed Dockerized sandbox execution environments with automated validation harnesses and structured logging for secure code evaluation workflows.
- Reviewed and guided open-source contributions to improve automated testing reliability, sandbox execution standards, and code quality across evaluation systems.

KwezyHQ

Software Engineer Intern

Remote

Aug 2025 – Oct 2025

- Built scalable backend services in Python using REST and GraphQL APIs for efficient data access and system integration.
- Developed FastAPI-based GPT inference pipelines integrating AI-powered workflows into production Next.js applications.

Superr.ai

Product Engineer Intern

Remote

Apr 2025 – Aug 2025

- Built AI-powered backend features in Python and integrated intelligent workflows into customer-facing product experiences.
- Integrated backend services and deployment workflows within a fast-paced startup engineering environment.

OPEN SOURCE CONTRIBUTIONS

SurfSense | 13.9k+ stars on GitHub | GitHub

- Contributed to SurfSense, an open-source alternative to NotebookLM for team research and knowledge retrieval, by fixing the chat-routes backend security vulnerability in PR #370.

Superset | YC-backed startup | GitHub

- Contributed to Superset, an agentic IDE, by shipping a Slack integration reliability fix that handled malformed JSON safely, resolved in PR #4145, and returned 400 responses instead of unhandled 500s.

ACHIEVEMENTS & LEADERSHIP

IIM Ahmedabad CTDTP 2025 | AI Accessibility

- Developed a dyslexia detection system by fine-tuning computer vision models on handwriting datasets and deployed it as a mobile application using MIT App Inventor, recognized among top AI accessibility projects.

IIM Ahmedabad IMRC 2025 | ML Forecasting

- Designed and implemented an XGBoost forecasting model for agricultural price prediction, benchmarking results against linear regression on structured government datasets.

Google Developer Groups (GDG) | Team Lead

- Led technical workshops on emerging technologies, guided students in open-source contributions, and developed internal platforms serving student communities.
